EXTERNAL COMMUNICATION

Listed B3 Participants

Re.: **Project for the Systemic Control of Give-Ups – Clearinghouse System
Provided for Testing in a Certification Environment**

B3 hereby informs you that as of **July 18, 2022** it will provide, for testing in the B3 Clearinghouse certification environment, a new procedure for processing give-ups outside of the rules established in the B3 Clearinghouse Operating Procedures Manual (Manual).

In this new procedure, the Clearinghouse will approve give-ups that are in breach of the rules established in the Manual, as already occurs in transaction allocation procedures.

The B3 clients' website (https://clientes.b3.com.br/en_us/) provides functional and technical details of this new procedure, as well as standard test rules for execution by the participants.

This new procedure is set to go into production in **October 2022**. The exact date will be announced in due course together with the changes to the Manual.

SINACOR will be eligible to handle the give-up flow with Clearinghouse approval as of version 22.3, which will be available for testing by the participants throughout August.
