

Mass Cancel

Trading Projects

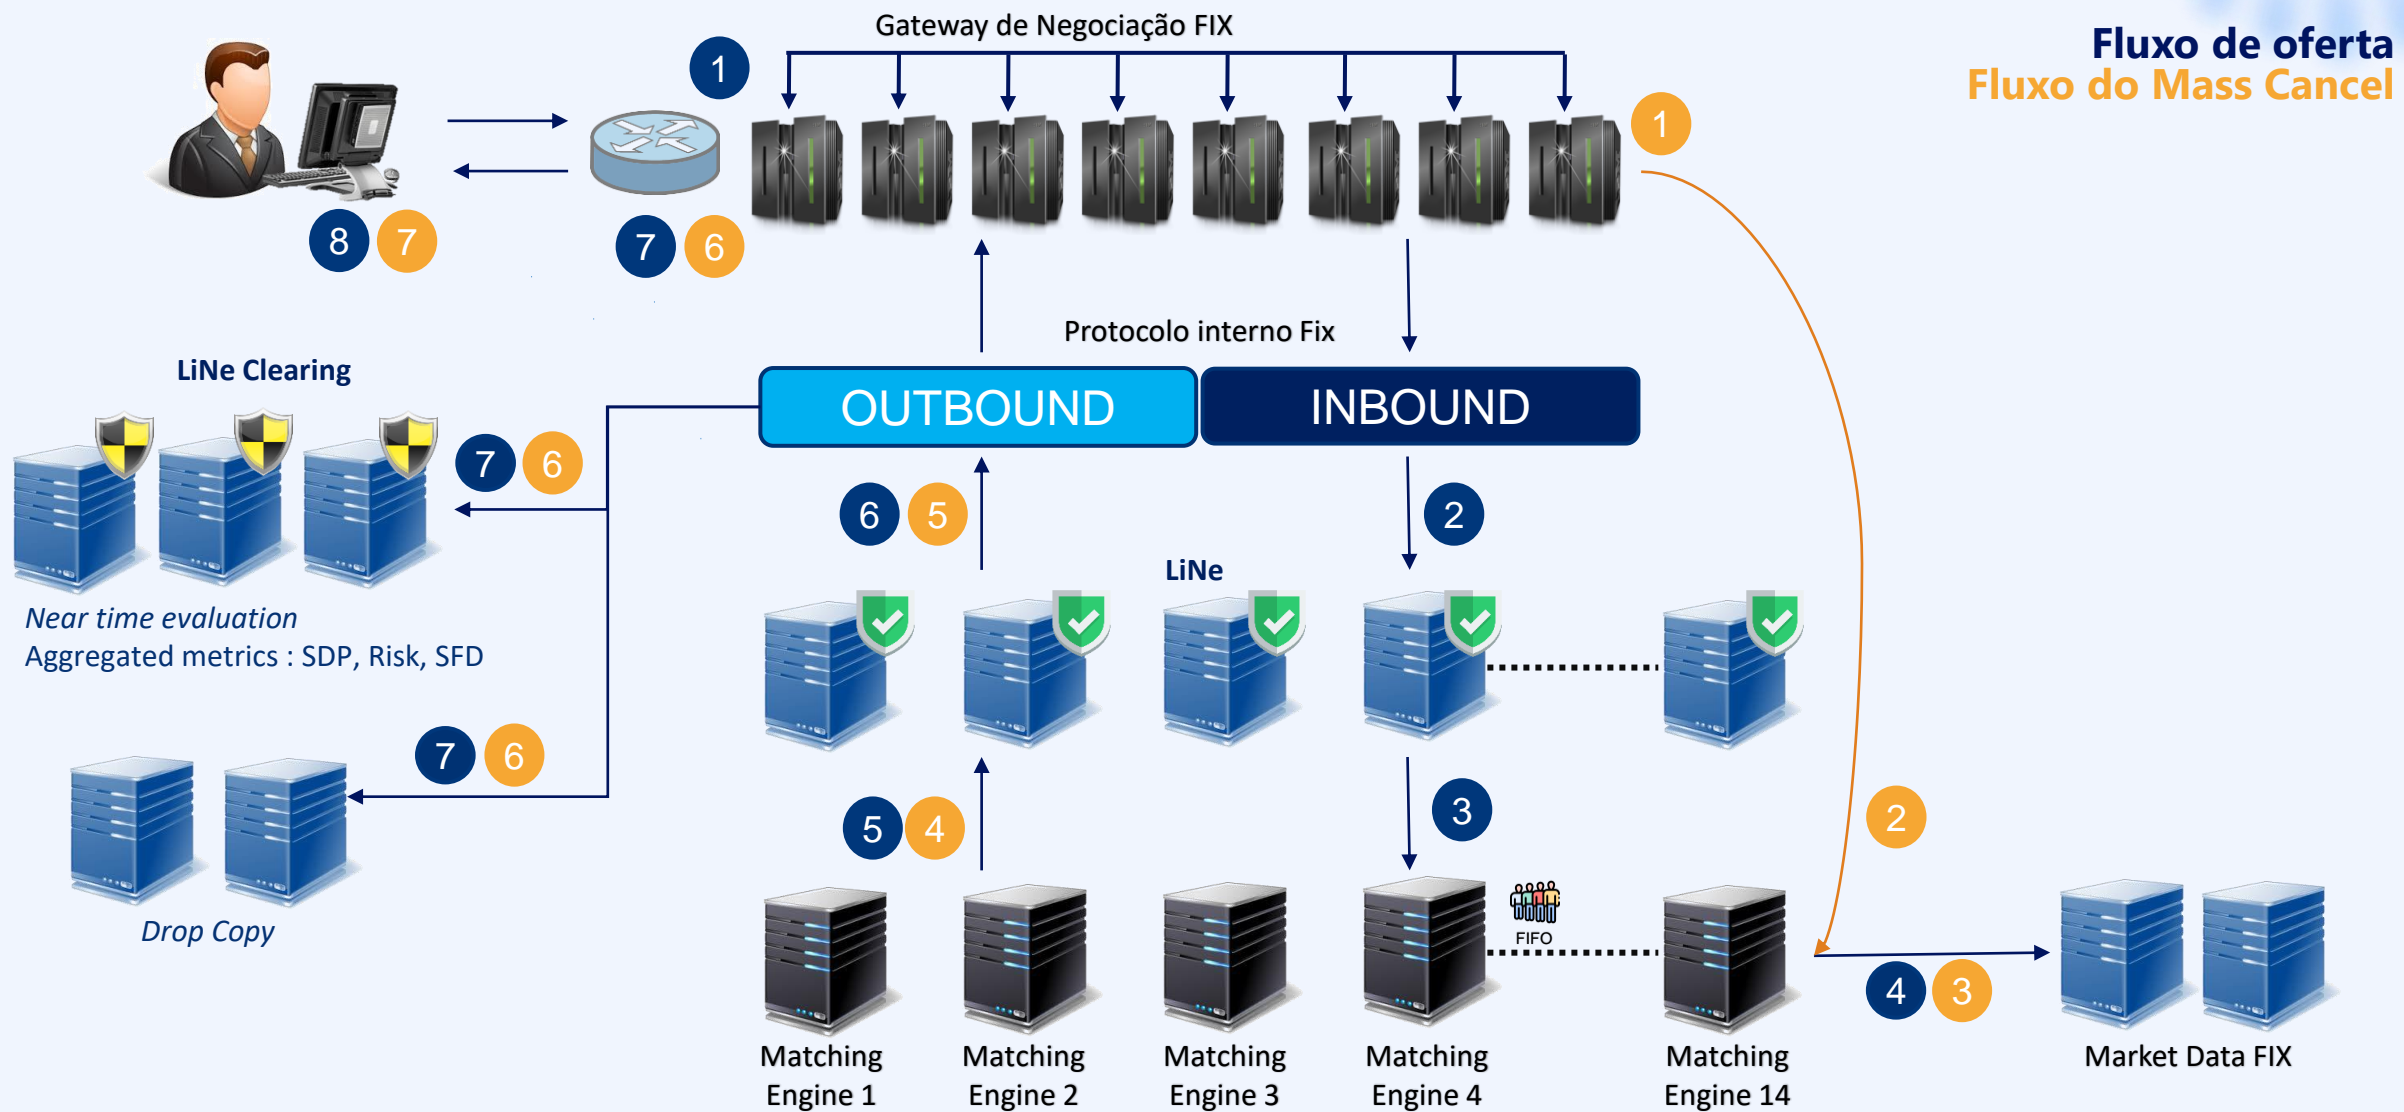

[B]³ MASS CANCEL

The mass Cancel functionality will be an Evolution of the Session Level Cancel and will allow market participants to mass cancel all the offers registered in the central order book.

- The filters can be combined;
- For this functionality the message will be duplicated by the gateway in a way that one of them won't be on LiNe critical path while the other one goes through LiNe;
- Certification will be mandatory only for the negotiation solutions that adopt this functionality;
- A schedule will be provided during B3 Week.

Filters	Description
Security Group (1151)	Allows the cancellation all the active orders of all the instruments in a certain negotiation group
Symbol (55)	Allows the cancellation of all the active orders in a single symbol
OrdTagID (35505)	Allows the cancellation of all the active orders in the order book identified by value assigned by the client at the moment of the registration
Side (54)	Allows the cancellation of all the buy orders or all the sell orders
